Pend Oreille Basin - WRIA #62

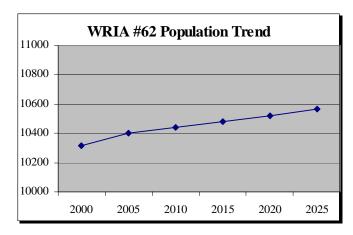

Watershed Description

WRIA #62 encompasses about 794,546 acres. This watershed is part of the Northern Rockies ecoregion. Rugged, high mountains are the dominant feature of this region. Elevations are generally 1,300 to 8,000 feet. Mountains have sharply-crested ridges and steep slopes cut by steep walled narrow stream valleys. Soils are derived from acidic rock. Potential natural vegetation includes western white pine, lodgepole pine, western red cedar, Douglas-fir, wheatgrass, fescue, and needlegrass. Average annual rainfall is 34 inches per year.

Population

There are approximately 10,358 people living in the Pend Oreille Basin. The primary population centers are Newport and Ione. The majority of people live in unincorporated areas. The population graph reflects the combined projected population of those counties located within the watershed (Office of Financial Management population projections).

Counties	% of basin	
Pend Oreille	97%	
Stevens	3%	

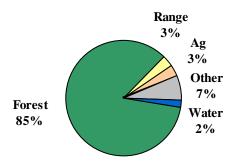

Tribal Reservation Lands in WRIA #62	
Kalispel Tribe	

Land ownership for WRIA #62 includes federal, state, tribal, and private lands. Data was derived from the Public Lands Survey by Washington Department of Natural Resources (DNR). The sum of public lands subtracted from the calculated WRIA acreage yielded total private lands.

Land Ownership	Acres	Proportion
Federal	525,466	66.6%
State	27,898	3.5%
Local	0	0%
Tribal	4,740	0.6%
Private	231,431	29.3%

Land use in the Pend Oreille Basin is mainly forestry and agriculture-related uses. The general type of known land-use activities¹ within the watershed is graphed according to the percentage of its occurrence.

Land Use in Pend Oreille Basin

¹ Category "other" may include perennial ice/snow, bare rock/sand/clay, quarries/strip mines/gravel pits, transitional, barren, and/or wetland areas.

The primary towns and cities in WRIA #62 include Newport, Ione, Metaline Falls, and Cusick.

Legislative and Congressional Districts

To determine your region's legislative or congressional district, see:

http://www1.leg.wa.gov/DistrictFinder/Default.aspx

To determine Latitude/Longitude coordinates, see:

http://www.topozone.com/

(Make sure you set the button on the bottom of the page to D/M/S - hold the cursor over a spot on the map and the coordinates show at the bottom of the screen.)

Several federal programs refer to watersheds according to their Hydrological Unit Code (HUC). To learn more about your watershed and determine which **HUC** your town or county is located in, see:

http://water.usgs.gov/wsc/

Water Quality

Water Quality Assessment

The statewide Water Quality Assessment categorizes waterbody segments that have water quality data available. The Simple Query Tool and interactive mapping tool allow you to search for specific categories, water bodies, pollutant parameters, and other information, in whatever combination you choose. **WRIA** #62 has thirty-five (5) known Category 5 (impaired) water bodies.

To view the Water Quality Assessment, use the Simple Query Tool.

http://apps.ecy.wa.gov/wats/WATSQBEHome.asp

To view the Water Quality Assessment by Category, choose the Category (1-5) you are interested in from the drop down box. To view it by Water Resource Inventory Resource Area (WRIA), choose the WRIA number you are interested in from the drop down box.

Use the Interactive Mapping Tool to see a graphic representation of the Water Quality Assessment. This is a Geographic Information System (GIS) application that helps you find waters you are interested in and information about problems in that water body.

Domestic Water Supply

No significant use of surface water sources. For further information regarding water supplies, see:

http://www.doh.wa.gov/ehp/dw/default.htm

Salmonid Stock Status

Good water quality is important to help salmon survive and thrive. To find out which salmon species are listed as threatened or endangered in a region, see:

http://www.governor.wa.gov/gsro/regions/map.htm

Air Quality

Water quality can be affected by air quality; for example, windblown dust from construction sites or bare, dry agricultural lands, especially fallow fields, may be transported to waterways. For information about air quality, see:

http://www.ecy.wa.gov/programs/air/aginfo/Windblown_dust_information.htm

TMDLs and Other Watershed-Based Plans

For information about Total Maximum Daily Loads (TMDLs) in your area, see:

http://www.ecy.wa.gov/programs/wg/tmdl/

To learn more about watershed planning in Washington State, see:

http://www.ecy.wa.gov/watershed/index.html
